

POSITION OPENING

Job Title: .NET Web Developer

Job Description:

The Auditor of Public Accounts, a legislative agency of the Commonwealth of Virginia, is looking for a .NET web developer responsible for building and maintaining web applications. Duties will span from front-end design to back-end functionality. Developer's primary focus will be to provide innovative design, implementation, and maintenance of data-driven websites – with emphasis placed on front-end UI design. The developer will be expected to collaborate with a diverse team of professionals to achieve a common vision and direction for development.

Responsibilities:

- Develop front-end web interfaces using HTML/CSS/JavaScript best practices
- Develop back-end functionality utilizing .NET (C#/VB) framework best practices
- Integrate data from various back-end sources
- Proper documentation of all work
- Maintenance and monitoring of developed websites
- Collaborate with other team members

Requirements/Skills:

- Proficient understanding of front-end languages & technologies, such as:
 - HTML5, CSS3, JavaScript (including jQuery)
- Proficient understanding of back-end languages & technologies, such as:
 - ASP.NET, C#, VB, LINQ, SQL
- Capable of designing modern, intuitive web-based user interfaces
- Knowledge of Object Oriented Programming best practices
- Knowledge of web development principles including session & security management
- Knowledge of cross-browser and mobile development requirements
- Knowledge of graphing software (e.g. Tableau) a plus
- Adequate understanding of relational databases and concepts
- Ability to solve problems in a creative, efficient, and effective manner
- Strong organizational skills, proactive mindset, and willingness to learn
- Strong interpersonal skills and ability to collaborate with a diverse team
- B.S. in Computer Science, Information Systems, or a related field

Salary: Commensurate with experience. Salary range starts at \$53,000 with full state benefits
